Front-End Engineer & UI/UX Specialist with over 4 years of experience crafting high-impact, accessible, and performance-optimized web experiences across telecommunications and enterprise platforms.

SUMMARY

Creative and technically versatile developer with a strong foundation in visual design and a passion for crafting engaging digital experiences. Known for bridging design and engineering through thoughtful collaboration and a user-first mindset. Experienced in building scalable front-end components, managing cross-functional design systems, and delivering projects in fast-paced Agile environments. Adept at navigating complex systems like Adobe Experience Manager (AEM) and Adobe Target, and at driving component consistency and audit strategies across global teams. Comfortable in both highly technical and creatively strategic conversations.

AREAS OF EXPERTISE

Front-End Development ■ UI/UX Design ■ Design Systems ■ Accessibility ■ Responsive Web Design ■ React HTML/CSS/JavaScript ■ GSAP & Web Animations ■ Adobe AEM ■ Adobe Target ■ Figma ■ Tailwind CSS ■ Code Connect MutationObserver ■ Agile Methodology ■ Lighthouse/PageSpeed Optimization

ACCOMPLISHMENTS

- Designed and shipped dynamic, accessible UI components for Boost Mobile, Gen Mobile, and OnTech Smart Services platforms, helping improve performance and usability across multiple brands under EchoStar/DISH.
- Implemented custom scripts using MutationObserver to dynamically inject, alter, or remove modal content, SVGs, and form elements across complex DOM structures without reliance on DOMContentLoaded or innerHTML.
- Led accessibility and performance audits using Lighthouse and PageSpeed Insights to identify and resolve issues across BoostMobile.com, improving site health and user experience.
- Spearheaded a comprehensive Design System Audit, identifying naming inconsistencies and redundancies across thousands of components and tokens. Proposed a future-proof audit process using Figma plugins and analytics to replace spreadsheet-based tracking.
- Collaborated cross-functionally with design and engineering to implement a unified system of tokens and variants in Figma; troubleshoot "missing variant" issues and streamlined naming conventions across multiple libraries.
- Built a SwiftUI proof-of-concept app to compare SVG and PDF assets with brand/dark mode toggles, enabling product stakeholders to evaluate image rendering quality and scalability.
- Advocated for smarter workflows leveraging Figma Code Connect and CLI tools to streamline handoff between design and development, especially in complex design system environments.
- Created interactive modals, headers, dropdowns, and carousels using pure JavaScript/CSS, optimized to avoid white flashes or DOM conflicts in production environments.

CAREER PROFILE

Senior Front-End Web Developer

EchoStar (2021 – Present)

Key projects include Boost Mobile, Gen Mobile, OnTech Smart Services, and Adobe Target integrations.

Senior Graphic Designer

Terraslate (2018 - 2020)

Pop Your Pup (2015 - 2017)

RECENT EXPERIENCE

Senior Front-End Developer, EchoStar (2024 – Present)

- Designed and implemented reusable React components to support Boost Mobile's digital experience across desktop and mobile platforms.
- Partnered with UX and product teams to launch responsive, WCAG-compliant UI components aligned with business goals.
- Developed high-performance JavaScript utilities (MutationObservers) to manage dynamic DOM content in live environments, avoiding brittle selectors and race conditions.
- Conducted a full-scale audit of the Design System used across multiple brands, identifying gaps and proposing scalable solutions using Figma plugins (Design Lint, Instance Finder).
- Led conversations with the Digital Design System team to improve design-to-dev workflows, incorporating Code Connect and proposing GitHub integration to manage tokens and components.
- Deployed optimizations for critical assets like hero images and Lottie animations to reduce load times while preserving visual fidelity.
- Regularly contributed to performance tracking and reporting using tools like Lighthouse and PageSpeed Insights, aligning improvements with OKRs.

Junior Front-End Developer, DISH (2021 – 2023)

- Lead front end web developer building Ontechsmartservices utilizing Shopify Backend and Shogun Frontend
- Implemented Greensock(GSAP) capabilities as well as building new components from scratch with HTML & CSS, leading to OnTechs first \$1,000,000 week in sales.
- Utilized Flashtalking platform to build DCOs using HTML, CSS & JavaScript. Implemented the Greensock(GSAP) Library for additional animation capabilities, providing eye popping animations to catch the users eye, all using Javascript.
- Utilized Wordpress in conjunction with the Divi theme to build the OneTen-Creative Agency Homepage and career site.

Production Manager/Graphic Designer Specialist, Terraslate (2018 - 2020)

- Managed a team of producers designing original brochures and menus using waterproof and tearproof paper.
- Designed and facilitated production of restaurant menus, ensuring high-quality and timely delivery.
- Led team collaboration to incorporate best design practices into production workflows.

Senior Graphic Designer, Pop Your Pup (2015 - 2017)

- Utilized Photoshop and Illustrator to create pop art from photographs, prepared for apparel or canvas.
- Collaborated with clients and designers to ensure quick turnaround times while maintaining quality.
